

Advocate for Rural Iowa  
priorities at [iaruralpower.org](http://iaruralpower.org)

Locally owned electric cooperatives are proud to power lives and empower communities throughout rural Iowa. Join our grassroots effort through Iowa Rural Power to promote safe, reliable, affordable and environmentally responsible energy for rural Iowans.

It's more important than ever that policymakers at the state and federal levels understand how proposed energy policies will affect our rural communities. Rural Power advocates are leading the way to ensure that electric cooperative member-consumers have a voice.

Stay informed on emerging issues and help us communicate rural Iowa priorities to policymakers and candidates. Learn more at [iaruralpower.org](http://iaruralpower.org) and follow Iowa Rural Power on social media.
